### DETAILED ACTION

Claim 21 is pending in the instant application.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claim 21 is rejected under 35 U.S.C. 102(b) as being anticipated by Mortimer.

Mortimer (GB 2,131,292) relates to progestational pharmaceutical formulations and their use. Mortimer teaches that synthetic compounds are known which are related to progesterone and exhibit similar hormonal activity (page 1, lines 36-37).

Progestational agents are known to cause desquamation of superficial cells of the vaginal mucosa, inhibit ferning of the cervical mucus, and induce withdrawal bleeds in oestrogen primed women (page 1, lines 46-48). Mortimer teaches that patients for whom progestational agent therapy is appropriate would benefit from treatment with folic acid (page 1, line 57-58). Examples of synthetic progesterone suitable for use in the invention include: Norgestrel and Norethisterone (page 2, lines 25 and 27).

As both Norgestrel and Norethisterone as listed as suitable compounds in the instant application (see page 19 and 20), the instant claim is anticipated.
